

Greater Orlando Aviation Authority: A Client Success Story

Over a period of two project phases, the Greater Orlando Aviation Authority (GOAA) sought one or more implementation partners to facilitate and assist in updating their Oracle installation. Phase 1 involved the upgrade of GOAA's Oracle Applications from Release 10.7 to Oracle E-Business Suite 11i, in addition to implementing new modules. Phase 2 would be initiated at the discretion of GOAA based on their satisfaction with the completion of Phase 1.

AST was chosen as the sole partner to GOAA for both phases, due to our competitive advantages in experience with major airports and aviation authorities, Oracle specialization, competitive pricing, and the ability to fulfill each of GOAA's needs within the proposed timeline and budget. Production cutover was achieved successfully with limited interruption of the GOAA's business by employing multiple practices of the migration process before production. Seven of our consultants were used for all aspects of both phases of the project, employing our proven EAM and EDM methodologies to ensure a comprehensive approach to the project.

We worked with GOAA's team to meet all deliverable goals with minimal customizations to their Oracle Applications. At the conclusion of the upgrade and implementation phases, we provided formal training sessions on new features for each module upgraded or implemented. In addition, our consultants acted as mentors to the GOAA's staff throughout the project, ensuring that a proper knowledge transfer occurred for GOAA to independently manage, upgrade and maintain the Oracle E-Business Suite Applications and environment.

Our Oracle E-Business Suite Applications consulting experience in providing planning, assessment, migration, implementation, training and support services makes AST Corporation is the systems integrator of choice for airport and aviation authority organizations.

Greater Orlando Aviation Authority

Oracle Applications

- Oracle General Ledger
- Oracle Accounts Payable
- Oracle Accounts Receivable
- Oracle Purchasing
- Oracle Inventory
- Oracle Projects Accounting
- Oracle Grants Management
- Oracle Cash Management
- Oracle Human Resources
