**DATE: July 21, 2005**

**HEADLINE: AST celebrates 10 year anniversary, paying tribute to the International Special Olympic Games**

Naperville, IL – Ten years ago on July 21, 1995 AST was incorporated to provide a high quality consulting service exclusively focused on Oracle Applications.

Twenty-seven years ago, almost to the day (20 July 1968), inaugurating the first International Special Olympics Games, Chicago Mayor Richard J. Daley said to the Special Olympics founder Eunice Kennedy Shriver - "You know Eunice, the world will never be the same after this." Today it is clearer than ever just how perceptive Daley was.

We too had a vision. Building a world class consulting organization dedicated to the highest levels of customer service, satisfaction and value addition for the users of Oracle ERP Applications. Today, just as when the Special Olympics Games were first organized, we strive to do better every day; and thank those employees, partners and customers that helped us perform beyond all expectations over these years.

Throughout our existence, at times in a dramatically fluctuating market, it is a singular achievement that we had positive growth every year since our foundation. To celebrate ten years of continued success and in honor of our clients and our employees, AST has pledged to support the International Special Olympic Games and encourages our associates and partners to join hands by lending their support to this great international organization.

**About AST Corporation**

Established in 1995, Applications Software Technology (AST) Corporation, is an Oracle Certified Advantage Partner, an Oracle University training and delivery partner who is also certified as an Oracle On-Demand' implementation provider offering professional consulting services to Oracle Applications users and serves industry-leading organizations in manufacturing, transportation, insurance, retailing, telecommunications and the public sector. Clients look to AST Corporation for assistance in business process redesign, project management, systems integration, systems administration and training.
