College of American Pathologists Implements Oracle Entitlements Server

Implementation is part of CAP's most strategic project for 2013/2014

Naperville, IL June 6, 2014: Following the success of its implementation of its Oracle Identity and Access Management project in 2013, the College of American Pathologists (CAP) again teamed with AST Corporation to implement Oracle Entitlements Server (OES) to augment CAP's Identity Management Suite. OES is a fine-grained authorization product that allows CAP to protect its resources by defining and managing policies that control access to, and usage of, those resources. Access privileges are defined in a policy by specifying who can do what to which resource, when it can be done, and how. CAP is now able to externalize entitlements, i.e. remove security decisions from its portal application.

The OES implementation is one of the largest Oracle OES implementations to date, and replaces CAP's 10-year-old system, Crosslogix. This implementation provides one of the most critical applications for CAP, and is considered to be the foundation for CAP's future enhancements to its portal application, which is used by over 7,000 laboratories associated with CAP.

Thomas Chanter, CAP Project Manager, praised the work of the AST team: "A major success! Thank you all for your efforts! Certainly we encountered some challenges, but the team was top-notch and worked through them with a high level of expertise and confidence!"

AST Corporation is a Platinum level member of Oracle PartnerNetwork.

About the College of American Pathologists

The College of American Pathologists (CAP) is a medical society serving more than 17,000 physician members and the global laboratory community. CAP is the world's largest association composed exclusively of board-certified pathologists and is the worldwide leader in laboratory quality assurance. CAP is the leading organization of board-certified pathologists, serving patients, pathologists, and the public by fostering and advocating excellence in the practice of pathology and laboratory medicine worldwide. More than 7,000 laboratories are accredited by the CAP, and approximately 23,000 laboratories are enrolled in the College's proficiency testing programs.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through

competency development, business results, expertise and proven success. To find out more visit <http://www.oracle.com/partners>.

About AST Corporation

Established in 1995, AST Corporation is a Platinum level member of Oracle PartnerNetwork (OPN), Specialized Oracle Applications and Technologies systems integrator, an Oracle University training and delivery partner, and a certified Oracle Cloud Services implementation provider. AST's services encompass all aspects of Oracle E-Business Suite, Business Intelligence, Enterprise Performance Management, Fusion Middleware, and CRM implementations, as well as flexible, on-shore Managed Services and comprehensive Oracle University courses. AST serves industry-leading public sector and commercial organizations: municipal, state and federal government; public transportation; airport and seaport; K-12 and secondary education; utilities/energy; manufacturing; insurance; retailing; telecommunications. Clients look to AST Corporation for leadership and assistance in systems integration, business process redesign, project management, systems administration and training.
