GOAA Selects Hyperion Planning and Budgeting in the Cloud

First-ever Hyperion Cloud implementation in the public sector

Naperville, IL November 1, 2014: Greater Orlando Aviation Authority (GOAA), which encompasses Orlando International Airport (MCO), will implement Oracle Hyperion Planning and Budgeting Cloud Services (PBCS) as their budget and planning tool and has selected AST Corporation as their implementation partner. PBCS is Oracle's SaaS Hyperion Planning solution.

This will be the first implementation of Hyperion Cloud (PBCS) in the public sector.   The Hyperion PBCS solution will provide GOAA with robust planning capabilities that will integrate with their existing E-Business Suite Financials. The solution will enable GOAA to achieve highly configurable models and integrations in support of their budgeting and reporting processes.

AST Corporation is a Platinum level member of Oracle PartnerNetwork and is widely known for their successful implementations of traditional, on premise or hosted Hyperion Public Sector Planning and Budgeting (PSPB) tools. In fact, the first-ever implementation of Hyperion PSPB (using an on premise model) was completed by AST Corporation. AST was a logical choice to implement the first-ever cloud-based PBCS solution for the public sector.

About Greater Orlando Aviation Authority

The Greater Orlando Aviation Authority (GOAA) is the governmental entity that operates Orlando International Airport (FAA ID: MCO) and Orlando Executive Airport (FAA ID: ORL) in Orlando, Florida. GOAA is tasked with the operation, maintenance and administration of all public airports in Orange County, Florida, including any public airports which may be built in Orange County in the future.

Orlando International Airport is an international airport located six miles southeast of Orlando, Florida. It is the second-busiest airport in the state of Florida the 13th-busiest airport in the United States and the 29th-busiest airport in the world by passenger traffic.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit http://www.oracle.com/partners.
