Third Annual Mid-Atlantic E-Business Round Table Draws More Than 100 Users

Public Sector Users Gathered to Increase Knowledge of Oracle Products and Services

Naperville, IL May 22, 2015: AST Corporation was pleased to sponsor the Mid-Atlantic E-Business Round Table on Thursday, May 21, 2015 for the third consecutive year, where over 100 users from 17 public sector organizations gathered to discuss Oracle-related topics. This free event is a great example of what can happen when users come together to share information.

The full day of sessions began with an Oracle Keynote speech on Driving Change in Government with Modern Technology. Participants were then offered a series of breakout sessions that enabled them to explore the topics of greatest interest to them and their organizations. Topics included a breadth of Oracle subjects, including Recruitment, Procurement, Open Enrollment, Planning & Budgeting, Contracts and Reporting. A majority of the sessions were delivered by the user community to increase knowledge sharing and collaboration.

The group issued a special thanks to the hosts of the event, Henrico County, VA. More information on the group and event can be found at: http://www.ebizroundtable.com/Mid-Atlantic_Roundtable/Mid-Atlantic_Roundtable.html

About the Mid-Atlantic E-Business Round Table Event

The Mid-Atlantic E-Business Round Table event began in 2013 with a group of 20 Oracle E-Business Suite users from four Public Sector organizations who desired the ability to share their knowledge in an informal setting. In 2014, the event expanded to include more than 50 attendees, drawing participants from a dozen public sector organizations from Richmond, VA to Baltimore, MD. Attendee organizations included municipal governments, school districts, transit agencies, utilities and more. In its three-year history, the group has grown exponentially in both attendees and breadth of topics covered to include additional Oracle applications and technology being used in the Public Sector.

About AST Corporation
