Testing-as-a-Service for Cloud Applications

Ensure faster, more reliable, and cost-effective testing for Cloud (SaaS) Applications

AUTOMATE AND ACCELERATE CLOUD (SAAS) APPLICATION TESTING

Take the pain out of testing Cloud Applications and deliver high-quality digital transformation projects faster with our next-generation test automation services, powered by AST's Autonomous Cloud Tester (ACT). ACT is the foundation of AST's Testing-as-a-Service (TaaS) offering, which accelerates release, patch, and upgrade test cycles across the breadth of Oracle Cloud Applications and beyond.

A SEAMLESS, END-TO-END TESTING EXPERIENCE

Born out of our vast expertise with Cloud Applications, our services have rapidly grown to include a variety of platforms - ensuring that testing is truly end-to-end.

Anticipate:

- Our framework quickly maps your unique business processes, user roles, and configurations
- Proactive review of upcoming releases identifies potential impacts

Automate:

- Coverage for recurring SaaS upgrades and patches
- End-to-end test scenarios include:
    - Business Transactions;
    - Complex workflows;
    - Inbound and outbound integration; and
    - Seeded and custom reports

Accelerate:

- Improve testing accuracy while reducing costs
- AST-driven test analysis yields quicker results
- Mitigate risk with faster identification of defects
- Decrease audit response times via in-built tools and controls
- Rapid provisioning produces zero impact to inflight project timelines

65%	Expected Reduction in Annual Testing Costs
80%	Reduction in Regression Testing Time
90%	Faster Detection of Defects
1500	Prebuilt Accelerator Components for Rapid Deployment
100%	Remote Delivery
100%	Test Result Traceability to Support Audits

Powered by ACT: AST's proprietary test automation platform
